25X1X

No aircraft or flying was observed at the Stendal-borstel (A 53/Y 75) airfield. The hangars were closed. Soldiers and sentries wearing black-bordered, black epaulets were seen near the field kasernes.

Comment:

No change as compared with observations of January 1950. It is assumed that an air unit is not stationed at the field. As motor vehicle numbers belonging to air force units have been continually reported from Stendal, it is assumed that an air force ground unit is still stationed there. The field kasernes apparently are occupied by an army unit.
